A CARD. HEREWITH wish to inform the public, that I have now the most complete assortment of goods ever found in one establishment; a part of the goods, which I have lately received, are advertised in this paper. As the hollidays are near at hand I wish especially to call atlention to that part of my stock, which comes the most in conflict with the hollidays. In the eating line, I have a choice selection of fruits and confectioneries, the candles are beautiful indeed. Toys I have got an endless variety; wax dolls almost equal to nature, from 25 cents to 82 a piece, also do I heads with glass eyes, from 15 cents to 150 cents. Teasets, wooden, pewter glass, percelahand china; French fancy glassboxes, silver wire bags, baskets, and pincushions, some beautiful gilled chinaw we as cups and saucers, imags, flower vases, candle sticks, funt baskets, cic. Teething rings and children's rattles of every variety, withow her backets and coder pads; figures and animals a very furge as-ortment; they'er vives guild a hite may, but not lovely wax fixures, diabasier in sands and crucifixes, horsemen, furniture, etc. Also a choice selection perfumery. New figs, raisins, lemons and oranges, I have under way from New Orleans, they will be here in time for the hollidays. I shall be very glad to get opportunity as often as possible to show my goods, as I am convinced that they will give entire satisfaction. Thankful for the liberal patronage I have so far received, I shall never lose a moment to show, that I appreciate the same, by keeping a good stock of goods

INTERESTERY TO PARTIES. apolis, a must "Gatling's Patent Wheat Drills". The subject of planting wheel ha rows, or with a drilling machine, has long been familiar with the English husbandman, and for several years past has been in practice with many of the enterprising farmers of New York. Pennsylvania, and others of the older wheat growing States. Agricultural papers have often abuded to the practice, advising its adoption, and giving many results showing a saving of seed and of labor, and a greatly increased yield of grain. Five bushels and upward per acre, or twenty to thirty per cent, has been the usual increased yield or the boot least system. Wheat planted by this machine is equal-And a variety of articles suited | iy distributed in rows to a uniform depth. Hence a uniformity in the size and length of straw, not to be found in wheat mixed with the earth at various depths, as by the old method. Many advantages inits otifity by practice; one of the most prominent of which is, the protection of the wheat from being winter killed. About 10 acres per day with a machine adapted to this section of country, and 14 to 16 acres per day with those suitable for a prairie, may be estimated as the UST received at GRAYDON'S, sign of the Saw, a supply of best usual days' work for a hand and two Porses to plant all complete. horse, to the extent of six to ten acres per day. A writer in the Genese Farmer, February number, 1849 page 40, speaking of Drilling and Horse hoeing, assetts, upon his own experience, that "land that or-OF different sizes of Pittsburgh manufacture, tested and for sale dinarity produces only fifteen or twenty bushels per acre, will under be obviated by getting one of TALBOTT'S new style for commission, by KELLOGG & YANDES, sign of the Big favorable circumstances, yield from thirty five, and even as 82 y high as forty bushels per acre.
